Hi Kim. Thanks for the response. I will go ahead and contact Focus Points and get all the organizing/advertising going for the EPA Quarterly Meeting at Focus Points on June 18 from 5:30 to 7:30. Do you mind letting the CAG know, if you have not already, that the June meeting will not be a regular CAG meeting, but rather our Quarterly Meeting?

By the way, EPA did not develop the Quarterly Meeting idea as a response to the CAG. You'll remember we were hosting monthly CAG meetings, and about a year ago or so, we proposed going to quarterly CAG meetings to reflect the pace and amount of work. When the CAG decided to run the CAG meetings itself, EPA committed to still hosting quarterly meetings for the CAG and the broader public. I recall that we discussed combining the time, date, place for these quarterly meetings with the CAG meetings that month so the CAG wouldn't have two separate meetings to attend.

Regarding the work at OU2, we may not have as much detail to share as you are asking for, but we can speak to the topic generally. Jesse asked Denver to prepare a tech memo that summarizes the work done after the 2009 Remedial Investigation to serve as the basis for the scope of upcoming work. As soon as EPA approves that memo, we can send it to you and the CAG for discussion. Maybe it will be ready by the July CAG meeting, but I'm not sure yet.

OK, see you soon.

Thanks Kim, and I hope all is well.

-jc

Jennifer,

The EPA is welcome to provide its quarterly update at the June CAG meeting. As the quarterly update meeting was developed as a response to CAG, with the idea of it being presented at our May 2018 meeting, I would appreciate it if you would message the meeting as the EPA's Quarterly Update being presented in conjunction with the VB/I-70 Community Advisory Group.

I request that the OU2 presentation cover the scope of the Remedial Investigation, the methodology for how the work is being carried out and the timeline that the EPA has set for it. We are also interested in a detailed report on both the meetings and work that has been done to date and that which is planned going forward. If this information is not provided within EPA's June presentation, we will request that you cover it at our July meeting. Our group is committed to the spirit of which the EPA designed the CAG and to fulfilling its responsibilities to the EPA and to the community. Doing so requires EPA partnership in this effort.

Please provide me with the prior studies that are being utilized in EPA's assessment for the new investigation no less than 2 weeks prior to the June 18th meeting.

Thank you.

Kim

Hi Kim. Thanks for the email - I was going to email you this afternoon! June is the month for our EPA VB/I-70 Quarterly Public Update meeting. The last one was in March. I recall that we were in agreement to combine efforts every third month and the EPA Quarterly Meetings would take the place of those CAG meetings. EPA will advertise and plan and present at the quarterly meetings, and we will host them the same time and place as the CAG meetings every third month (in 2019 that is March, June 18, and September 17) at Focus Points. Please let me know if that still works for you and the CAG.

Thanks,  
-jc

p.s.. I will forward to you a draft agenda soon so you and the CAG can provide input. An update/discussion of OU2 will certainly be on it.

Welcome back Jesse and Jennifer.

Hope you both enjoyed the holiday weekend.

I'm following up on my request for you to join the CAG in June to discuss OU2. Please confirm.

Kim
